

## OneFlat Air gelb

Light weight pressure hose made of rubber, abresion and weather resistant

|                     |                                                                                                                                                                                       |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Applications</b> | compressors, construction machines, compressed air, waste water, construction drying                                                                                                  |
| <b>Structure</b>    | NBR, yellow, opaque                                                                                                                                                                   |
| <b>Temperature</b>  | -35°C up to 80°C                                                                                                                                                                      |
| <b>Properties</b>   | very good temperature resistance, good low-temperature flexibility, weather proof, hydrolysis & microbe resistant, crush-resistant, can be driven over, very high pressure resistance |

| Inner Diameter (mm) | Max. Operating Pressure (bar) | Burst Pressure (bar) | Total Weight per Piece (kg) | Length (m) | Article Number |
|---------------------|-------------------------------|----------------------|-----------------------------|------------|----------------|
| 19                  | 20,00                         | 80,00                | 72,00                       | 20         | 1870190200     |
| 25                  | 15,00                         | 60,00                | 72,00                       | 20         | 1870250200     |
